1 Statement

HYCON Technology Corporation positions ourselves as a leading manufacturer of high precision integrated circuits in analog and digital signal processing applications.

Our quality system is in full accordance with ISO9000 procedures. Our products are not only innovative and leading-edge from a design perspective, but they are also, based on our reliability data, exceptionally robust and conform to industrial standards resulted from their high stability. HYCON Technology Corporation strives to produce reliable and high-quality products that meet customers' requirements.

Due to the rising environmental and human rights concerns around the world, the need for environmental protection and hazardous (banned) substance elimination in electronic components and systems is receiving increased attention within the semiconductor and electronics industries. HYCON Technology Corporation asserts the concept of sustainable corporate development and social responsibility and respects international human rights therefore we have been devoted to the provision of Green products and all products supplied to customers are of conflict-free minerals.

Our products are Green Products that are Halogen Free and in compliance with the Prohibited / Restricted Hazardous Substances List and are in compliance with Restriction of Hazardous Substances (RoHS) Directive (EU) 2016/293, (EU) 2015/863, 2011/65/EU and REACH 1907/2006(EC) ANNEX XVII and SVHC (Substance of Very High Concern) under REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) current version of restricted substances and prescribed regulations.

If necessary, please contact HYCON Technology Corporation's sales/agents for more information, and we will keep on providing our best support and service to you.

Sam Sun
Senior Manager, QC. Dept.,
Quality Assurance Division.
HYCON TECHNOLOGY CORPORATION

2 ISO Certificate

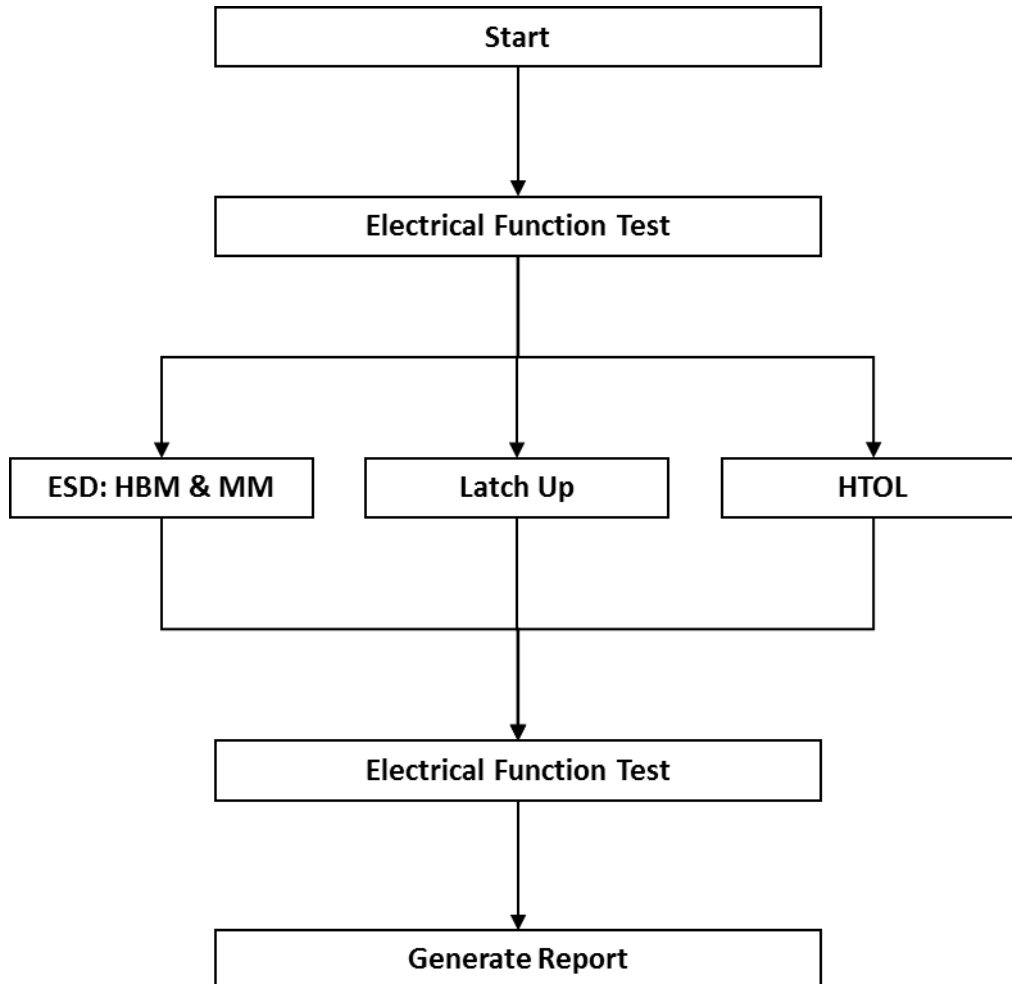

Audited by creditworthy TÜV SUD Asia Pacific Ltd. TÜV Süddeutschland Group, HYCON Technology Corporation procured the anticipating certificate of ISO 9001:2008.

HYCON Technology Corporation is certified in the scope of “Design, Manufacturing, Marketing and Service of Integrated Circuits”.

By fulfilling ISO 9001:2008, it is the very first stage of quality management system of HYCON Technology Corporation. We’re going to continuously practice quality objective, “Ceaseless Quality Improvement”, “Fearless in Confronting Challenges”, “Innovative Thinking” and “Sticking to Commitment” in every products realization and company evolving activities. HYCON Technology Corporation devotes to provide customers, representatives, suppliers with total satisfaction.

4.3 Identification of Product Label

4.3.1 Label System Upgrade

In order to improve management and traceability, we upgrade label system and introduce 1D and 2D bar code. New label was launched since 2015 Q4.

Currently, both labels are standard HYCON formats and the change of label shall not affect the function and specification of the products.

4.3.4 Symbols of Label

- 4.3.4.1 The "Pb-free, Green" mark means it is Green Product that meets RoHS Directive, SVHC under REACH and Halogen free.
- 4.3.4.2 MSL: Moisture Sensitivity Level.
- 4.3.4.3 Plating Spec:
 - e3: Pure Sn
 - e4: Precious Metal.
- 4.3.4.4 260C: Peak temperature of IR Reflow.
- 4.3.4.5 "MSL", "Plating SPEC" and "260C" are showed on package type of product label ONLY.
- 4.3.4.6 Above data refers to IPC/JEDEC Joint Standard J-STD-609.

✘ The definition of criterial is based on the specification of DIRECTIVE REACH 1907/2006(EC), (EU) 2016/293, (EU) 2015/863, 2011/65/EU (RoHS 2.0), 2006/122/EC(PFOS), 2002/61/EEC(AZO Colorants), 2003/03/EEC, IEC 61249-2-21 (Halogen Free), Norway PoHS (Prohibition on Certain Hazardous Substances in consumer Products), JIG-101 Ed 4.1, Japan Chem-sub Law, Japan Industrial Safety and Health Law (ISHL), Basel Convention, Stockholm Convention, OSPAR and etc., and refer to SONY GP (SS-00259), Apple (069-1857-B, Halogen Free) and (069-0135), Dell (A01-00), and Foxconn (ESD-A0RH-004). Test reports provided by our suppliers are available upon request.

5.2 Substances of Very High Concern for authorization (SVHC)

- 5.2.1 The substances of Very High Concern (SVHC) are not contained in HYCON Technology Corporation's product based upon the information collected from our supply chain. The "not contained" means equal or less than the defined threshold in the material. The defined threshold is 0.1 % (1,000 ppm) per weight, unless otherwise specified.
- 5.2.2 Our products are in compliance with the SVHC under REACH current version of restricted substances and prescribed regulations.
- 5.2.3 The latest list could be referred to <http://echa.europa.eu/candidate-list-table>

5.3 Restricted Use of Conflict Minerals

- 5.3.1 HYCON Technology Corporation hereby declares all products supplied to customers are of conflict-free minerals.

Over the past few years, provoking society and environmental problems generated from manufacturing product raw materials and processes has grabbed the public's attention. Minerals from Democratic Republic of the Congo (DRC) even raised serious armed conflicts. Despite HYCON Technology Corporation does not procure minerals directly ourselves, still asserting the concept of sustainable corporate development and social responsibility and respects international human rights. HYCON Technology Corporation is in support of not using conflict minerals and is committed to fully survey supply chain, taking social and environmental responsibilities together with joint vendors, thus hereby declares:

1. Not to purchase conflict minerals from mines in the conflict regions.
2. Demand joint vendors not to use conflict minerals and to disclose the origin of Tantalum (Ta), Tin (Sn), Gold (Au), Tungsten (W), Cobalt (Co), Palladium (Pd) used in products and to provide restricted use of conflict minerals letter of commitment.
3. Demand joint vendors to formally convey the request of Restricted Use of Conflict Minerals to their upstream suppliers.
